The Descent - Wikipedia

The Descent is a 2005 British adventure horror film written and directed by Neil Marshall The film follows six women who, having entered a cave system, struggle to survive against the humanoid creatures inside Filming took place in the United Kingdom Exterior scenes were filmed at Ashridge Park, Hertfordshire and in Scotland Because the filmmakers considered it too dangerous and time-consuming to shoot in an actual cave, interior scenes were filmed on sets built at Pinewood Studios near London designed by Sim...

In gradient descent algorithm, convexity of the target function plays an important role in determining whether or not the algorithm will converge, the convergence rate and so on We didn't cover too much about convex function in the class So here we will go through some useful techniques for examining convexity of a function 5

Stabilized Approach and Go-around

descent ratio, and not stable, often had high rates of descent and high approach speeds A deeper look at the analysis shows that, even at 20 nm from touchdown, when a flight is above the optimum "3:1" descent ratio, the approach is more at risk of being unstable when closer to the runway (ie, 500 feet to 1000 feet height above touchdown)
